SMU SIKKIM UNIVERSITY	Program & Course Outcomes
Program Name	M.Sc. Nursing
Program Code	205

## **Program Outcomes**

- **PO1:** Post Graduates will be able to apply the concepts, theories and principles of nursing science
- PO2: Post Graduates will be able to demonstrate competencies in nursing practice
- PO3: Post Graduates will be able to practice as Clinical Nurse Specialist
- **PO4:** Post Graduates will be able to establish collaborative relationship with the members of other disciplines
- PO5: Post Graduates will be able to assume leadership in various care settings
- **PO6:** Post Graduates will be able to participate in health planning, implementation and evaluation at different levels of health care system
- **PO7:** Post Graduates will be able to function as effective nurse educators and nurse managers
- **PO8:** Post Graduates will be able to conduct independent nursing research and utilize the research findings in nursing practice/education
- **PO9:** Post Graduates will be able to critically evaluate various educational programmes in nursing
- **PO10:** Post Graduates will be able to demonstrate interest and positive attitude in continuing education for personal and professional growth.

Program Name	M.Sc. Nursing
Program Code	205

## **Course Outcomes**

First Year M.Sc.	Nursing
Course Code	Course Outcomes
	<b>CO1-</b> Students will be able to apply the principles, concepts, trends and issues related to nursing
NURSING	education
EDUCATION	CO2- Students will be able to utilize different types of teaching learning process and instructional
NR2101	aids
	<b>CO3-</b> Students will be able to critically analyse the existing nursing educational programs, their problems, issues and future trends
	CO4- Students will be able to plan and conduct continuing nursing education programs
	<b>CO5-</b> Students will be able to describe the process of curriculum development, the need and
	methodology of curriculum change, innovation and integration in nursing
	<b>CO6-</b> Students will be able to describe the development of standards and accreditation process in nursing education programs
	<b>CO7-</b> Students will be able to apply the principles, steps, tools and techniques of evaluation
	CO8- Students will demonstrate the ability to construct, administer and evaluate the various tools for
	assessment.
ADVANCE	CO1 - Students will be able to explain the ethical, legal, political and economic aspects of health care
NURSING	delivery and nursing practice
PRACTICE	CO3 - Students will demonstrate the ability to apply the concepts, principles, theories, models,
NR2103	approaches relevant to nursing practice in the health care delivery system
	CO4 - Students will be able to describe the scope of nursing practice and provide holistic and competen
	nursing care following nursing process approach
	CO5 - Students will able to identify the latest trends in nursing and the basis of advance nursing Practice
	CO6- Students will be able to perform extended and expanded role of nurse
	CO7- Students will be able to appreciate importance of self-development and professional
	advancement.
NURSING	C01 - Students will be able to apply the concepts of scientific inquiry in the nursing practice
RESEARCH	CO2 - Students will be able to utilise the various research methodology in their practice
AND	CO3 - Students will be able to critically analyse research studies and to develop acceptable research
STATISTICS	proposal
NR2102	CO4 - Students will be able to demonstration competency in conducting individual health related
	research, write, present, interpret and utilize research finding
	<b>CO5</b> - Students will be able to write a scientific paper for publication.
OBG NURSING NR2105	<b>C01</b> - Students will be able to apply the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium
	<b>C02-</b> Students will be able to demonstrate comprehensive nursing care to women during reproductive period and newborns
	CO3 - Students will be able to integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing
	<b>C04</b> - Students will demonstrate the ability to illustrate different pharmacological agents, their effects
	during pregnancy, puerperium, lactation and the role of nurse
	<b>C05</b> - Students will be able to play the role in various types of complementary and alternative
